

EARLY SPAY/NEUTER PROGRAM

Pets must be between 5 and 24 months of age. All dogs must have a current Distemper and Rabies vaccine, heartworm test and blood work performed. All cats must have a current FRTC and Rabies vaccine, FeLV/FIV test and blood work performed.

The prices below include the pre-surgical exam, IV catheter, surgical fluids, anesthesia, the surgical procedure, cold laser therapy, surgical monitoring, hospitalization, pain management and an e-collar.

MALE CATS : \$190

FEMALE CATS : \$300

Blood work must be performed prior to surgery. It is strongly recommended to have the blood work done before the day of surgery. Blood work costs range from \$63 to \$195 based on what the patient is due for. **THIS IS IN ADDITION TO THE COST LISTED ABOVE.**

All patients will receive a pre-surgical physical exam and their blood work will be reviewed. Any problems found will be discussed with the owners prior to surgery and may result in additional costs. All surgeries will be performed in our hospital using sterile operating procedures and advanced patient monitoring by our fully trained staff.

Surgical complications may result in additional charges. Complications include, but are not limited to, undescended testicles, pregnancy, pyometra, estrus (in heat) or hernias.
